

What We've Been Up To!

In **Grade 3 Math**, we are moving into term 3 and beginning to represent and describe numbers all the way up to **1000!** We will do this through games and hands on activities, incorporating some fun while we learn.

We will also be revisiting skip counting by **3, 4, 5, 10, and 25** during warmups and "At Your Seat" work.

In **Art**, we completed our "Funky Bunny" for Easter and the students did an excellent job using sharpies to doodle various patterns. We will be completing some abstract art soon with torn paper projects.

In **FLORA**, we are continuing with every day classroom questions / answers and the seasons, along with fun songs and games.

In **Health**, we continue to get outside for fresh air and unstructured time for regulation. This week we are discussing every day stresses and how to manage and decrease them.

In **Music**, we are learning The Cup Song and students are doing a fantastic job with learning on their own in groups! Soon we will be able to perform together and pass the cups around a circle.
