

What We've Been Up To!

In Grade 3 Math, we are working on 3 digit addition strategies and revisiting mental math subtraction strategies. We will soon be conducting surveys and creating bar graphs, as well as revisiting other skills learned so far. Lots of fun games and outdoor learning to come, too!

In Art, we will soon be working on our end of year memory book.

In FLORA, we are continuing with our online program.

In Health, we continue to get outside for fresh air and unstructured time for regulation. We are beginning to explore careers as well.

In Music, we will be completing a big biography poster project on students' favorite musical artist and continuing to explore our online music program.
