

1. Write four related facts for each set of numbers:

a) 8, 9, 72 _____

b) 6, 8, 48 _____

2. How does knowing the product $7 \times 8 = 56$ help you to find the product 7×9 ?

3. Write a multiplication fact that can help you find each quotient.

a) $25 \div 5 = \underline{\quad}$ b) $56 \div 8 = \underline{\quad}$
 $\underline{\quad} \times \underline{\quad} = \underline{\quad}$ $\underline{\quad} \times \underline{\quad} = \underline{\quad}$

4. Suppose you want to find 8×14 . What multiplication fact could you use to help you?

5. How can you divide by 2 to find $72 \div 8$?
Show all the steps.
