

MARCH 20TH-24TH

WEEKLY RECAP AND UPCOMING

Last week we worked on talking about our immediate family in French. We also learned some fun St. Patrick's day French vocabulary and coloured in leprechauns based on our preference. Students did a great job listening and watching for visual cues to help them understand their choices!

This week we will learn how to talk about our extended family by sharing photos and describing the photo to the class.

MATH

We will continue to work on long division for the first part of this week, then will switch gears mid week!

REMINDER

There is no school for students on Friday, March 24th
